Visa Application:
The USA has an extensive, time consuming and expensive application process. Given the extent of various forms and requirement for a whole afternoon of waiting, I would recommend beginning the process as early as possible.

Enrolment Procedure and recommended subjects:
Compared to the Visa process the enrolment process is a dream 😊 Subject list is broad, interesting and staffed with some very well respected experts in their field. Wish I could do more! I recommend Financial Reporting and Statement Analysis for an interesting perspective on interpreting business health.

Workload at exchange school:
Working part time in conjunction with study I found the workload quite high. The sheer number of additional activities available outside of class certainly stretches spare time, but is well worth opportunity to meet other students.

Accommodation options:
Campus accommodation is not available for exchange students. Hanover is a small college town where share housing is the most likely option for short term visits.

Campus Facilities
Excellent technology, library and flexible study areas. Comfortable and well resourced.

Careers Services:
Extensive career services provide contact with almost every major company in the USA.

Student life:
There is a good number of extra-curricular clubs and activities. The student body is very close knit but very welcoming to the exchange students.

Things AGSM MBA students should consider/be aware of when applying to this school for exchange:
Transportation options are limited to taxi on weekends (or bike depending on weather). Living close to campus is a must. Health coverage does not include dental and is expensive although similar to other US universities.

Highlight:
It was very beneficial to access an extremely well-credentialed and helpful alumni network who regularly visits for talks and advice sessions. Other students are more than welcoming to their consort and happy to discuss their industry experience.
