

AGSM @ UNSW Business School

AGSM Progression Planner

Tools to help you plan your progression

1. Know the structure and courses

[Know your structure & requirements](#). You can also find course overviews in the drop-down course descriptions. Note for new or recently revised courses these may not be available before enrolments open. Courses are reviewed for minor changes each time they are offered, and are fully revised every few years (depending on the course they may be put on hold for several Terms while this happens)

2. Know what is happening & when

The [Timetables and Key Dates page](#) is your best friend! Useful documents include:

- Key Dates (Annual) – save these dates into your calendars, diaries, and schedules – never miss an important date again
- Annual Course Calendars – these display the courses we have to offer across each Term for the year. They do change every now and then, so **check it each Term** just in case you need to amend your plan. *Note: the 4 GCCM/Change Specialisation courses alternate Terms each year*
- Term-by-Term Class Schedules – these are typically released around 2 weeks before enrolments open, so save the date to check specifically what classes are offered, where, when and in what formats

3. Know what to do when Class Registration time comes

As time goes on, technology changes and the enrolment platform is often updated – we try to have an up-to-date class registration guide available on the [Timetables and Key Dates page](#) when possible, usually grouped with the Term schedules for convenience

4. Contact us if you're not sure about something

Post your question UCo. if you think the answer might help other students, or if it's personal you can email us at studentexperience@agsm.edu.au or give us a call on 02 9931 9400 during business hours

Start Planning

Year	Term 1	Term 2	Term 3
Example: 2019	MBAX9135 Business Analytics (weekly)	MBAX9125 Managing People and Organisations (Online)	MNGT6321 Corporate Finance (Weekly)
