Taxation is a key aspect of the modern economy. Almost every individual and corporation is exposed to taxation.

Taxation provides the government with funding to deliver essential services and to effectively manage the economy. As the Australian taxation system is complex, tax professionals are highly valued and play a vital role assisting organisations with a range of business decisions. These range from choosing the most appropriate company car to establishing retirement plans for employees to financing offshore expansion for businesses. A solid grasp of taxation legislation and policies enables companies and individuals to structure their business transactions in a tax-effective manner, thus increasing profit and efficiency.

OUTSTANDING CAREER OPPORTUNITIES
Taxation graduates are increasingly in demand due to the complexity of the Australian taxation system.

A graduate may be employed both in the public & private sector as a Taxation Advisor or Consultant for a range of organisations or use their skills in other positions such as an Accountant, Business Analyst, Compliance Officer, Corporate Advisor, Financial Planner, Insolvency Advisor or Policy Advisor in both the private and government sectors.

Organisations recruiting Taxation graduates include the Office of State Revenue, the Australian Taxation Office, The Commonwealth Treasury, Deloitte, (EY), Grant Thornton, Houwath, KPMG, (PwC) and Suncorp.

HONOURS PROGRAM
Students with above average grades in their Taxation major are invited to join the Taxation Honours Program, requiring an additional year of study. An Honours year adds extra value to an undergraduate degree by developing strong analytical and research skills. It is also highly regarded by employers and industry.
DEGREE OPTIONS

The Taxation major is offered in the following degree programs:

BCommerce, BCommerce (International) and BEconomics (as a 2nd major option).

Plus dual degree options – BCommerce with:

BArts, BAviation (Management), BDesign (Hons), BEconomics, BEngineering (Hons), BFine Arts, BInformation Systems, BLaws, BMedia (PR and Advertising), BMusic, BScience, BScience (Advanced Mathematics), BScience (Advanced) and BScience (Computer Science).
